## GETTING STARTED

While installing GnBots on PC may seem easy, it's important to **read each step carefully** as features will not work if setup incorrectly. Please read and follow the [install tutorial](#) in our guides. You must read this, or it won't work.

This version can only be ran on a Windows 7 or higher PC. If you are looking to run the bot on **Android, iOS or MAC** – You need the [Bot Server version](#).

Please join us in live chat [and leave a message](#)  
in your bot room. We will see you there!*

## HAVING ISSUES?

PC Version is our most difficult to get started as it requires some intermediate computer skills. We do have **other versions that are easier**.

Check out our [Farm for Me Service](#) where we set up and run everything for you. This guarantees **you get a working bot** and runs on any device!
